

# Huawei 5g base station circuit board

#### **Overview**

How many US components are in Huawei 5G base stations?

Adding to this, a recent teardown reveals that there is only 1% of U.S. components are now under work in the latest Huawei 5G base station. A teardown coming from China reveals that 5G Huawei small base stations (5G small cell, covering areas ranging from tens of meters to 1 kilometer) use the lowest proportion of American components at 1%.

Does the Huawei bbu5900 5G base station have an IC?

The Huawei BBU5900 5G base station contained only one IC on the backplane board, provided by STMicroelectronics.

Does 5G Huawei use the lowest percentage of American components?

A teardown coming from China reveals that 5G Huawei small base stations (5G small cell, covering areas ranging from tens of meters to 1 kilometer) use the lowest proportion of American components at 1%. A detailed report on this matter has a further description of the components.

What happened to Huawei 5G?

Huawei is the largest network equipment maker. After the U.S. ban, the company has reduced reliance on related components. Adding to this, a recent teardown reveals that there is only 1% of U.S. components are now under work in the latest Huawei 5G base station.

How much does a 5G base station cost?

More than half of the overall components used in the 5G Huawei base station are made in China. This is 7% more than Huawei's large 5G base stations. Looking back to 2020, a 5G teardown showed an estimated cost of 1320 USD, of which, the Chinese component accounted for 48.2 percent and 27 percent U.S. components.

Where does Huawei's 5th generation wireless network come from?

A breakdown by Nikkei of Huawei's core base station unit for fifth generation wireless networks has revealed that parts from U.S. suppliers make up nearly 30% of the product in value terms. has also shown that the main semiconductor device in the unit was supplied by a Taiwanese contract manufacturer.
