

# Huawei Vietnam Flywheel Energy Storage Project

#### **Overview**

Can solar and wind power meet Vietnam's near-term energy needs?

Such financial hurdles have challenged the government's ability to use fossil fuels to expand electricity supply in step with Vietnam's fast-growing economy. Contrastingly, solar and wind power's lower capital requirements and faster development timelines are well-suited to meeting Vietnam's near-term energy needs.

How can a new LNG-to-power project protect Vietnam from global fuel price volatility?

Prioritizing domestic renewables and grid resilience over new LNG-to-power projects can shield Vietnam from global fuel price and exchange rate volatility while still meeting demand growth. Vietnam stands at an inflection point.

How can the next chapter in Vietnam's energy story build on early successes?

The next chapter in Vietnam's energy story can build on early successes while adapting to key learnings and evolving market dynamics. Paige Nguyen serves as Director of IEEFA's Asia team, leading the organization's strategy, research, and communications efforts across the region.
