

Iceland battery energy storage system supply

Overview

How much does a battery cost in Iceland?

As of 2025, the average price for lithium-ion battery systems in Iceland hovers around \$150-\$200 per kWh. That's 10-15% higher than EU averages, thanks to those pesky import fees. But here's the kicker: Iceland's unique energy profile means batteries aren't just for grid backup.

Which lithium-ion battery should you buy in Iceland?

While lithium-ion remains the MVP, Iceland's researchers are betting on underdogs: Flow Batteries: Ideal for long-duration storage (think 10+ hours), these use Iceland's abundant vanadium reserves.

What is the supply voltage in Iceland?

In Iceland the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.
