

Indonesian large-capacity energy storage battery company

Overview

Jambi, February 18, 2025 – PT Cipta Kridatama (CK), a subsidiary of PT ABM Investama Tbk (ABMM), in collaboration with SUN Energy, has inaugurated Indonesia's first and largest Containerized Battery Energy Storage System (CBESS) for Solar Power.Who are Indonesian solar battery storage companies?

Indonesian solar battery storage companies mainly include energy storage system integrators, charging infrastructure providers, battery manufacturers, energy storage project developers and energy storage product traders. These companies focus on different aspects such as development, design, construction, production and trade.

Will Indonesia build a battery energy storage system?

JAKARTA, March 18 (Xinhua) -- Indonesia's state-owned electricity company PT PLN and its subsidiaries have collaborated with the Indonesia Battery Corporation (IBC) to build a battery energy storage system (BESS) with a capacity of 5 Megawatts (MW) this year.

What is Indonesia's first & largest containerized battery energy storage system?

Indonesia's First & Largest Containerized Battery Energy Storage System. Offgrid solar energy system at PT Cipta Kridatama equipped with CBESS. The CBESS solar energy system at PT Cipta Kridatama Jambi operates off-grid, making it a reliable, self-sustaining energy source without dependence on the national electricity grid.

Is battery storage taking off in Indonesia?

Despite the opportunities for manufacturing, from a deployment perspective, battery storage has not yet taken off in Indonesia beyond a handful of projects, including a 5MW pilot announced by the government in March 2022. Rept Battero has announced plans to develop an 8GWh gigafactory in Indonesia specialising in lithium-ion cells for BESS.

Does Indonesia need a solar energy storage system?

As Southeast Asia's largest economy, Indonesia aims to source 23% of its energy from renewables by 2025, with plans to escalate this ratio by 2050. Energy storage systems (ESS) are critical to stabilizing the nation's grid and enabling seamless integration of solar power.

Could energy storage be the future of Indonesia's energy transition?

With variable renewable energy generation, such as solar PV and wind, set to take centre stage in the country's energy transition, energy storage will complement this. This potential has seen several prospective manufacturing facilities proposed in Indonesia.
