

# Inverter uses a small power battery

### **Overview**

The inverter draws its power from a 12 Volt battery (preferably deep-cycle), or several batteries wired in parallel. The battery will need to be recharged as the power is drawn out of it by the inverter.

# Inverter Power Draw: How Much Power Does an Inverter Use from a Battery?

Small inverters typically use between 10% to 20% of their rated power from a battery. For instance, if a small inverter is rated for 1000

#### What to Know About Inverter Batteries

Inverter batteries are storage batteries and are mainly used to provide back-up power when an off-grid solar system is powered off. They are usually deep cycle batteries, able to repeat ...
