

# Iranian building solar power generation

## **Overview**

Iran is taking a significant step forward in renewable energy with an ambitious plan to develop 15GW of new solar capacity by 2030. This initiative which is centered around solar photovoltaic (PV) power stations marks a major shift in the country's energy strategy.

### Iranian building solar power generation

## First Phase of Iran's Largest Solar Power Plant Goes Online

Developed by MAPNA Group specialists, the plant is located 45 kilometers from Isfahan and covers an expansive 1,200-hectare area. According to project officials, this first ...
