

### Is outdoor power supply safe in Vietnam

#### **Overview**

Do I need a power adapter in Vietnam?

Whether you'll need a power adapter depends on the type of plug your devices use. Here's a breakdown based on travelers from different countries and continents: In North America, the standard plug types are Type A and Type B, with a voltage of 120V. Since Vietnam uses Type A, C, and F outlets, you'll need a Type A/B to Type C/F adapter.

Can I use a 240V power supply in Vietnam?

If so, you can use it in Vietnam with the correct plug. Otherwise, you will need a transformer to convert the voltage from 110V to 220V. You likely use 220-240V, which is the same as Vietnam's electricity supply, so you don't need to worry much about the voltage.

Do you need a voltage converter in Vietnam?

In North America, the standard plug types are Type A and Type B, with a voltage of 120V. Since Vietnam uses Type A, C, and F outlets, you'll need a Type A/B to Type C/F adapter. Additionally, as the voltage in North America is different, you may also need a voltage converter for devices that are not dual-voltage.

What types of electrical outlets are used in Vietnam?

Vietnam primarily uses Type A, Type C, and Type F electrical outlets. These types are common in many Asian and European countries. Has two flat parallel pins. Also known as the standard "Euro" plug, Type C outlets have two round pins. Also known as "Schuko," Type F outlets have two round pins with two earth clips on the side.

What voltage does Vietnam use?

The good news is that it's easy to find the most up-to-date information on the voltage in Vietnam, so you'll know exactly what type of plug adapters or

power strips you'll need to bring with you. The majority of Vietnam operates on a 220-volt system, but you will find outlets operating at both 110 and 240 volts.

How many types of power outlets are there in Vietnam?

Vietnam has three primary types of power outlets in use: Types A, C, and G. Here's a breakdown of each: Type A: Two flat parallel prongs, commonly found in North America and Japan. Although this type can occasionally be found in some parts of Vietnam, it's not the most common. Type C: Two round prongs, widely used throughout Europe.
