

# Is there a large demand for outdoor power supplies in Paraguay

### **Overview**

Paraguay is the only country in Latin America with almost 100 percent hydroelectric generation capacity (8,116) in 2005. Paraguay operates two binational hydroelectric dams. , by far the largest power station in the country, is operated with and has an installed capacity of 7000 MW (86 percent of Paraguay's generation capacity). , the second largest hydroelectric facility, has an instal.

Why are electricity tariffs so low in Paraguay?

Because of the dominance of hydroelectricity, tariffs (mostly residential) are remarkably below the averages for the region. However, despite the abundance of resources, the Paraguayan electricity system faces difficulty due to the lack of investment in transmission and distribution networks.

How bad are distribution losses in Paraguay?

In 2005, distribution losses in Paraguay were has high as 31%, well above the 13.5% weighted average for LAC and up from about 22% in 2001 System losses have become a serious problem in the last few years, having followed a continuous upward trend.

How many power plants does Ande have?

ANDE controls the country's entire electricity market, including generation, transmission and distribution. ANDE operates only one hydroelectric dam, Acaray, and six thermal power plants, with total installed capacity of 220 MW.
