

Island Communication Base Station Inverter Battery Standard

Overview

What is a sunny island battery inverter?

The Sunny Island battery inverter supports a wide range of on- and off-grid installations with compelling product features — from operation in off-grid areas to home energy management. Users can benefit from SMA's experience in having installed more than 150,000 Sunny Island inverters worldwide.

Can an SMA sunny island 6.0h/8.0h inverter communicate with a pylontech battery module?

This document provides guidance on configuring an SMA Sunny Island 6.0H/8.0H inverter to communicate with Pylontech US2000, US3000, or Phantom-S 48V lithium-ion phosphate battery modules for off-grid applications.

Can I order a PV inverter with default island grid/backup parameters?

You can order all PV inverters with default island grid or backup parameters from SMA Solar Technology. WARNING! As soon as you set a PV inverter to island grid/backup parameters, the device no longer complies with certain standards and guidelines (e.g. in Germany the DIN VDE 0126-1-1).

How many sunny island inverters are there?

Users can benefit from SMA's experience in having installed more than 150,000 Sunny Island inverters worldwide. Thanks to its integrated user interface and standard WLAN and Ethernet in-terfaces, the Sunny Island 4.4M / 6.0H / 8.0H can be immediately and easily commissioned and configured via smartphones or tablets.

How to connect sunny island to SMA inverter?

Install communication cable to SMA Inverter wiring socket. Only the Sunny Island CAN communication interface is connected to the BMS, the second communication line – SYNC Bus is not connected to the BMS. NB: Using a CAT5

Ethernet Cable strip back the cable and connect to pins identified above.

How do I set the island grid/backup parameters?

Turn the rotary code switch to the position "E1". "E" stands for off-grid and "1" stands for German. After the first 10 operational hours you can only set the island grid/backup parameters using the communication devices. For this you need access permission. Set the parameter "GridGuard.CntrySet" to "None".
