

# Japan s bifacial solar panel production

#### **Overview**

Why is the bifacial solar market growing?

The bifacial solar market presents significant opportunities for growth driven by several factors. Firstly, the increasing global demand for renewable energy sources is propelling the adoption of bifacial technology, which captures sunlight from both sides of the panel, enhancing energy yields by up to 30% compared to traditional panels.

Why are bifacial solar panels gaining popularity?

Increasing demand for solar energy as countries and businesses aim to transition to cleaner energy sources, bifacial solars are gaining popularity due to their ability to generate more electricity compared to traditional monofacial panels in the same space. The growing demand for solar installations is a major driver for the market.

What is the global bifacial solar market size?

"The quality of research they have done for us has been excellent." The global bifacial solar market size was estimated at USD 16.07 billion in 2023 and is expected to grow at a CAGR of 15.1% from 2024 to 2030.

What makes Japan's solar panel manufacturing industry unique?

In conclusion, Japan's solar panel manufacturing industry is renowned for its innovation, quality, and commitment to sustainability. Leading companies like Primroot.com, Sharp, Kyocera, Mitsubishi Electric, and Panasonic produce high-performance solar products that meet stringent safety and efficiency standards.

What is framed bifacial solar?

The framed bifacial solar held the market with the largest revenue share of 85.67% in 2023. Framed bifacial panels, which can harness sunlight from both sides, are particularly appealing for commercial and industrial applications

where maximizing energy output is critical.

Are bifacial solar panels a viable option?

As the prices become more competitive with monofacial panels, bifacial panels are becoming an attractive option for both utility-scale and distributed solar projects. The bifacial solar market presents significant opportunities for growth driven by several factors.
