

Jordan Off-Grid Solar System

Overview

What are off-grid solar systems?

Off-grid solar systems are composed of solar batteries, solar panels, back-up generators, and off-grid inverters for homeowners in Victoria, who are living too far from the grid or aiming to be entirely independent of energy companies.

Why does Jordan need a solar PV installation & maintenance service?

Since Jordan started the solar PV installation in 2012, the demand for solar PV operation and maintenance (O&M) services increased, driven by aging systems requiring inverter replacements (every 8-10 years) and system optimization.

How many solar panels are installed in Jordan?

According to annual reports by Jordan's grid operators, the total installed ongrid solar PV capacity reached 2,073.86 MW by the end of 2024. This capacity is divided as follows: Distribution System Operators (DSOs): 1,081.86 MW across 74,145 projects. Transmission System Operator (TSO): 992 MW. The largest DSO-managed installations were by:

Why did Jordan develop a small Solar Utility?

We developed Jordan's first most price-competitive small solar utility along with keeping market needed requirements. Since then, we lowered levelized cost of energy through value engineering, operational research and efficient financial strategy to deliver cost-efficient energy for our customers.

Is there a cap on solar PV projects in Jordan?

In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations. A notable example is a 50 MW solar power plant financed by Cairo Amman Bank and currently under construction.

How much does solar cost in Jordan?

The commercial sector faces higher grid fees of 13 JD (\$18.3 USD) per kWac/month, reducing the economic viability of installations. In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations.

Jordan Off-Grid Solar System

off grid PV solar systems

An off-grid system is mostly used in places where there is no supply from the electric utility, it is suitable and ideal for supplying rural and remote areas with electricity, therefore this system ...
