

# Kazakhstan communication base station grid-connected photovoltaic power generation project

### **Overview**

With the combined efforts of the Sino-Kazakh team, the Kaskelen photovoltaic power station was successfully connected to the grid and commenced power generation in June 2020, generating 80.8 million kilowatt-hours of electricity annually and reducing local carbon emissions by 80,800 tonnes. What is a power grid in Kazakhstan?

Electricity Transmission Sector Power grids of the Republic of Kazakhstan are a set of substations, switchgears and interconnecting transmission lines of 0.4-1150 kV, designed for transmission and (or) distribution of electric energy.

Does China invest in New energy projects in Kazakhstan?

Nan Yi, chairman of the Chinese energy company, revealed that since 2015, the company has been investing in new energy projects in Kazakhstan, including photovoltaic and wind energy stations.

What is China-Kazakhstan Green Energy Cooperation?

The Kapshagay photovoltaic power station, one of the largest single solar power projects in the Central Asian country, is a part of the China-Kazakhstan green energy cooperation initiative, jointly invested in and constructed by the Chinese company Universal Energy and Kazakh counterparts.
