

Kosovo New Energy Battery Cabinet

Overview

Could a battery storage system save Kosovo's Energy costs?

In fact, a 2018 study by the World Bank, which had for years supported the construction of Kosova e Re, found that if taking carbon and pollution costs into account, a combination of renewables and battery storage would be the most cost-effective solution for Kosovo's electricity sector.

Who owns the energy facilities in Kosovo?

Kosovo* will own the facilities, the ministry added. Economy minister Artane Rizvanolli said the program would back the independence of the national energy system and enable its transformation. The details will be made known after negotiations between the government and MCC, planned for May.

How will Kosovo's Energy System work?

The system will stabilize the fluctuating frequency of electricity, store energy in the early hours of the morning when consumption is low, and connect with solar, wind, or similar power plants. Kosovo* will own the facilities, the ministry added.

Does Kosovo need a new energy sector?

Given this background, the Government of Kosovo has prioritized the modernization and improvement of the country's energy sector, and has asked its development partners, including the World Bank, European Commission, KfW, USAID, as well as other donors, for support and assistance.

How much does a grant to Kosovo cost?

The compact program for a grant to Kosovo*, estimated at USD 234 million, consists of two projects: batteries with an installed capacity of 200 MWh, and the development of the workforce and involvement of women in the energy sector, the Ministry of Economy said.
