But, If you are just concern about low THD, have a look at

our post about low THD generators.

How does a 12V DC inverter work?

This inverter can efficiently convert 12V DC from a battery into 220V AC, which can be used to power household appliances like lights and small fans. The SG3525 IC generates PWM (Pulse Width Modulation) signals, which are used to drive the IRF3205 MOSFETs. The MOSFETs switch the 12V DC battery power at a high frequency, creating an AC waveform.
