

# **Lithium battery pack discharge adjustable resistor**

## Overview

---

It costs less than \$2 to build one. The parts I am using are: 1. 5W 47ohm Radial Ceramic Resistor: 1.1. AliExpress: [https://s.click.aliexpress.com/e/\\_DI16CvR](https://s.click.aliexpress.com/e/_DI16CvR) 1.2. Amazon: <https://amzn.to/3LbOX3m> 2. XT60 Con.

## Lithium battery pack discharge adjustable resistor

---

### What resistor to use to discharge a 48V 1400WH Li-ion battery

You'll have to construct it from other resistors, for example by putting six 100+W 10hm resistors in series or four 125+W 240hm resistors in parallel - at least I suspect that would be cheaper and ...

### Using resistors to safely discharge a 48v 20Ah battery pack

With fixed resistors the only equipment you need is a multimeter and a clock. Using lamps, the resistance varies with voltage, meaning that you really need an ammeter as well.
