

Lithuania s photovoltaic energy storage power station connected to the grid

Overview

The Energy Cells storage portfolio (which follows a 1 MW/1 MWh pilot project deployed by Litgrid) is not only the first energy storage asset at this scale on Lithuania's transmission system, but also one of the first in the world to be directly procured by a Transmission System Operator (TSO) affiliate to demonstrate transmission-enhancing services.

Lithuania s photovoltaic energy storage power station connected to

Lithuania Photovoltaic Power Station Energy Storage Project

Our smart hybrid inverters offer seamless integration between solar power systems, energy storage units, and the grid. Equipped with intelligent algorithms, they enable real-time ...
