

Mali Forest Solar Electric System

Overview

How long does a solar power project last in Mali?

This project has an estimated lifespan of 25 years. / Mali is a landlocked country in the Sahel belt of West Africa where 80% of the population in the rural areas do not have access to electricity, while those with access are getting most of the electricity from diesel generators.

How many people in Mali have electricity?

Only 53% of Mali's population had access to electricity as of 2021, according to the latest data from the World Bank. In rural areas, access is as low as 25%, according to Abdoulaye Makan Sissoko, an official with Mali's rural electrification agency.

How many mini-solar plants are there in Mali?

The rural electrification agency says 32 mini-solar plants like the one in Karan are in four regions in Mali's south and southwest of the country, providing power for more than 2 million people, and are run by WeLight and Germanowned Africa GreenTec. "We started with 48 connections and now we have more than 200.

Does Mali need solar power?

While more than 83 per cent of Mali's population are still lacking energy access, the country has considerable potential to scale up clean energy access through solar power. Southwestern Mali alone has 53 Gigawatt of solar potential, enough to meet the whole country's power demand.

Can Mali achieve universal access to electricity?

In rural areas, access is as low as 25%, according to Abdoulaye Makan Sissoko, an official with Mali's rural electrification agency. Studies have shown that achieving universal access to electricity in Mali would require an investment of around \$1.3 billion to extend networks and create more mini-

grids, Sissoko said.

Does Mali have a rural electrification strategy?

Mali's current rural electrification strategy relies on decentralised dieselpowered mini-grids. However, there is an increased effort to decarbonise them.
