

Marshall Islands Energy Storage Plant Cooperation Project

Overview

The project consists of three main components: Renewable Energy Investments with a budget of US\$29.55 million, Promotion of Energy Efficiency with a budget of US\$1.47 million, and Technical Assistance, Capacity Building, and Project Management with a budget of US\$2.98 million. Where are Marshalls Energy's Solar panels located?

The Marshalls Energy Co.'s solar panels are on school and government building rooftops. Photo courtesy of Marshall Islands Energy Co. In order to stabilize power service, the Marshalls Energy Co. was forced to import more than half-a-dozen rental containerized generators last year that currently provide the backbone of Majuro's power.

How long does it take to build Marshalls power plant?

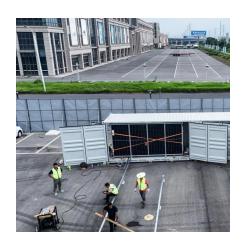

Demolition and clearing of the first power plant which opened in 1982, is nearly completed with construction of the new facility expected to start later in May. The new plant building is expected to take about seven months to construct, Jack Chong-Gum, CEO of the Marshalls Energy Co., said.

What is going on with Majuro's power system?

International donors and the Marshall Islands government have lined up to fund a huge overhaul of the power system for Majuro. This funding includes: ADB's ongoing nearly \$13 million grant that is supporting rehabilitation of the utility company's six-million-gallon fuel storage tanks — the largest in this part of the Pacific region.
