

Mauritius outdoor communication power supply BESS is available in a full range of sizes

Overview

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

What is BESS and how does it work?

BESS (Battery Energy Storage System) is a high-tech, ultra-fast response battery system designed to upgrade the electricity grid. It aims to make the electricity network in Mauritius smarter, more modern, and cleaner.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

What is attery energy storage system (BESS)?

attery Energy Storage System (BESS)Integrated Storage SolutionThe BESS can provide services to all areas of solution for on-grid.

Where are the BESS installations located?

The CEB has two BESS installations located at Amaury Substation and Henrietta Substation. Each BESS is made up of two containers of 20ft housing 10 racks of Lithium Ion batteries for a total energy storage of 1.12 MWh and two power converters with a total installed capacity of 2.24 MW respectively.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to

increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

Mauritius outdoor communication power supply BESS is available in

Renewable Energy: 20 MW Grid-Scale Battery Energy Storage

The main purpose of the BESS is to help stabilise the grid frequency in view of incorporating more and more renewable energy on the national grid. Renewable sources such ...
