

Mobile outdoor communication power supply BESS solution

Overview

What applications can a mobile Bess support?

The project aims to perform a thorough analysis of the various communication interfaces applicable to the applications that a mobile BESS can help support, of which, some typical VMS applications are construction sites, festivals, and EV charging stations.

What is a Bess system?

This BESS system provided the client with an energy solution that provides rapid power delivery to remote sites with the ability to leave a renewable power source connected for an extended period of time.

What is Bess & apex Energy Monitoring portal?

Suitable for a wide range of mobile communications applications including offgrid, emergency backup power, energy stabilisation and frequency response. Designed to be 'plug and play', BESS ensures swift installation and provides peace of mind. Apex Energy monitoring portal helps customers to keep an eye on multiple systems from a single location.

Which communication interfaces are compatible with a mobile Bess?

The investigation compares the identified communication interfaces and their respective applicability to a mobile BESS, specifically the VMS. For specific power utility applications, it is clearly noted that the standard IEC 61850 allows clear benefits compared to the other investigated interface.

Which is a typical utility Bess use case?

Which is one of the most typical utility BESS use cases, providing setpoints through operator or automatic control as in ancillary services. The three mobile storage applications presented in this section were identified and chosen through some application criteria. The applications presented focuses mainly on industrial and utility cases.

What is a typical mobile Bess application?

Another typical mobile BESS application is microgrid operations. Which could be at remote locations on or ofgrid depending on operation and grid availability. Typical usages are at construction sites or event/festival areas where grid connections may be severely inadequate or underdimensioned for the usage needed.

Mobile outdoor communication power supply BESS solution

What is a Mobile BESS and how does it work?

Unlike traditional fixed BESS solutions, these Mobile BESS are capable of being moved around flexibly, quickly and easily to different locations, making them a game-changing solution for ...
