

Mozambique Wind Power Storage

Overview

How much energy will Mozambique generate a year?

The plant will increase Mozambique's installed capacity by 50% and generate 8.6 TWh per year, enough to power more than 3 million homes. A GREEN REVOLUTION: The country is also actively developing other renewable energy segments, such as solar and wind, which together are expected to represent 20% of domestic energy production by 2040.

What is Mozambique's energy transition strategy?

Mozambique recently unveiled a game-changing energy transition strategy that is paving the way for heightened investment inflows and universal access to energy across the country.

What is the optimal power system expansion plan for Mozambique?

The optimal power system expansion plan if wind and solar capacity are allowed to triple to reach almost 3 GW by 2032. Currently, the power system of Mozambique is separated into two transmission networks isolated from one another: the Central-Northern and Southern systems. Over 50% of the annual power demand is seen in the Southern system.

Why is Mozambique focusing on hydropower projects?

Since Mozambique has high hydro power potential, the country is focusing on developing large hydro projects that aim to be operational at the beginning of 2030's. Hydropower projects play an important role in decarbonizing the power sector in Mozambique.

Does Mozambique have hydropower?

Including hydropower, renewables currently make up 70% of all energy produced in Mozambique. Hydropower has traditionally been the largest contributor to Mozambique's power production. The country has one of the largest potentials in Africa, largely thanks to the mighty Zambezi River, which

boasts a projected production capacity of 20 GW.

How much electricity does Mozambique have in 2021?

Despite this huge generation potential only 38.6%1) of its population had access to electricity in 2021. The total installed power capacity in Mozambique stood at around 2,800 MW in the year 2021 whereas the peak demand reported by the state-owned energy utility Electricidade de Moçambique (EDM) was at 1,035 MW.
