

Mozambique solar photovoltaic module manufacturer

Overview

Does Mozambique need solar energy?

In the rapidly evolving world of renewable energy, Mozambique has emerged as a significant player, especially in the solar energy sector. With its abundant sunshine and increasing focus on sustainable development, the demand for solar energy systems in Mozambique has seen a considerable rise.

Who is building a solar power plant in Mozambique?

The Spanish group TSK has won the contract to build the Cuamba solar power plant in the Niassa province of Mozambique.

Why is Mozambique a good place to invest in solar energy?

Firstly, Mozambique has a high solar irradiation level, making it an ideal location for harnessing solar energy. This abundant solar resource presents a sustainable and cost-effective solution for addressing the country's energy needs.

What is central solar de Mocuba?

Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year. The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid.

Where is Mozambique's power plant located?

The plant was built in the Zambezia Province in north-central Mozambique. Mozambique is one of the poorest countries in the world and access to electricity is extremely limited. In rural areas only 6 percent of the population has an electricity supply. National demand for electricity is growing significantly due to industrial and commercial growth.

How will Mozambique's power plant's strategic location affect the grid?

The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid. It is estimated that the power plant's connection to the EDM grid will result in a seven percent improvement in the network default level.
