

# Multi-function energy storage power supply procurement

### **Overview**

What does the PU's Energy Storage Procurement Framework do?

The PU's Energy Storage Procurement Framework provides crucial motivation to the development of both demand and supply in this marketplace. Since the time of Assembly Bill 2514 and through 2021 California built a rich ecosystem for energy storage research and development, commercialization, and project deployment.

What is the CPUC's role in energy storage?

In 2010, California Assembly Bill 2514 (Skinner) directed the California Public Utilities Commission (CPUC) to determine appropriate targets for the procurement of energy storage systems by electricity load- serving entities under its jurisdiction.

What is the CPUC Energy Storage Procurement Study?

The CPUC Energy Storage Procurement Study aims to improve data practices by addressing the lack of comprehensive and quality-controlled actual project characteristics and operational data across all resources and grid domains.

What is California's energy storage procurement framework?

California's energy storage ecosystem, built since Assembly Bill 2514 and through 2021, includes a crucial component: the PU's Energy Storage Procurement Framework. This framework motivates the development of both demand and supply in the energy storage marketplace.

What is technological maturity in CPUC energy storage procurement?

In the context of the CPUC Energy Storage Procurement Study, technological maturity is achieved through a path that includes research and development, pilot projects, and small-scale demonstration projects.

What is CPUC energy storage procurement study V Ancillary services?

Ancillary services in the CPUC Energy Storage Procurement Study provide grid operational flexibility and stabilization for reliable electricity delivery. CAISO ancillary services markets include non-spinning and spinning contingency reserves, and regulation up and down.

### Multi-function energy storage power supply procurement

## Multi-Period energy procurement policies for smart-grid ...

We analyze a multi-period energy procurement problem for an energy aggregator, which is responsible for the centralized control of energy procurement and consumption in a ...
