

# N-type photovoltaic module prices

#### **Overview**

N-type solar panels typically command a premium of 10-30% over standard P-type panels from the same manufacturer. According to RegenPower, current pricing for N-type panels ranges from \$0.40 to \$0.60 per watt, compared to \$0.30 to \$0.50 per watt for conventional panels. How much does a photovoltaic module cost?

Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of €0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of €0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

Do PV modules lose resale value?

For historical secondary market PV module pricing from 2020 through 2023, download the 2023 PV Module Price Index from EnergyBin's Resources portal. Overall, the price index shows that new PV modules don't tend to lose resale value in the U.S. secondary market unless their technology is older, such as Legacy POLY modules.

Why are PV module prices rising?

As we can see, in major tenders by PV utilities such as China Huadian Corporation and China Resources, manufacturers significantly raised their offers, further reinforcing the upward momentum in module prices.

## N-type photovoltaic module prices

# Solar Photovoltaic Prices, PV modules, PV glass, PV cells, PV ...

SMM brings you current solar photovoltaic equipment or material prices and historical price charts such as polysilicon prices, silicon wafer prices, battery cell prices, module prices, silicon ...

# Module prices rise: P-type hits 0.85 CNY, n-type crosses 0.9 CNY

Since mid-January, there's been a steady rise in polysilicon costs, especially for n-type materials, leading to talks of an imminent increase in module prices. Post China's New ...

WhatsApp

# N-type material prices have risen according to the latest figures.

Prices rose slightly in the week of September 18 compared with September 11. The average price of n-type material reached RMB41,700/ton (US\$5,933), up 0.24% month-on ...

<u>WhatsApp</u>

# Competition, oversupply to reduce n-type solar module prices

After supply chain issues eased, module prices started falling in 2023, driving utility scale projects that supplied 55% of the market in the

fourth quarter while DG solar matured.
