

Namibia photovoltaic module project

Overview

The NAD 1.6 billion (\$88.4 million) project uses funding from a loan secured in September 2024 from German development bank KfW, along with NamPower's own reserves. The project will create more than 300 direct jobs during construction. NamPower expects the solar plant to begin operations by June 2026.

Namibia photovoltaic module project

Finance and EPC contractors agreed for Namibia's largest PV plant

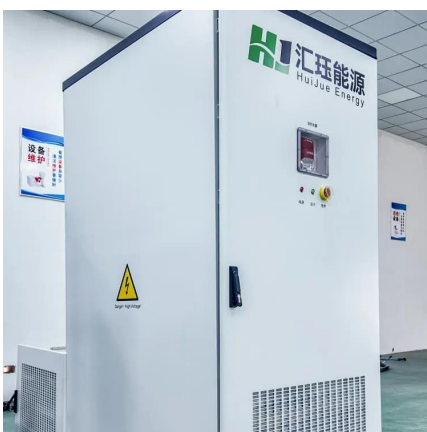

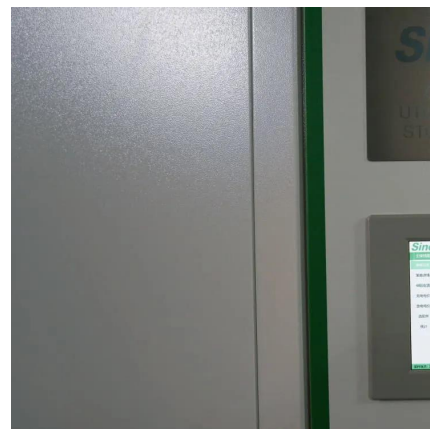

Namibian utility NamPower has advanced plans for a 100MW solar PV project with the agreement of a financing deal and the appointment of contractors to build the plant.
