

# New Energy Storage Investment Enterprises

#### **Overview**

The emerging landscape of energy storage investment firms is characterized by several key players, including 1. well-established firms pivoting to renewables, 2. startups focusing on innovative technologies, and 3. traditional energy firms diversifying their portfolios. Why is energy storage growing so fast in 2024?

Energy storage widens that neck. Global deployments jumped 53% in 2024 as utilities rushed to firm renewables and avoid blackouts. In the United States alone, developers added 12.3 GW / 37 GWh of capacity, enough to power 5 million homes for four hours. Three forces have converged to enable this growth.

Could a solid-state energy storage stock reset the value chain?

Among energy storage stocks, solid-state is the moonshot sleeve: binary outcomes, but a single winner could reset the entire value chain across electric markets. HQ: USA; Lithium-metal solid-state batteries using ceramic separators.

Are solid-state batteries the future of energy storage?

Electric vehicle (EV) adoption is one of the main drivers of energy storage technology. Solid-state batteries promise the holy trinity: higher energy density, faster charging, and inherent safety. They replace the flammable liquid inside today's cells with a solid ceramic or polymer, unlocking lithiummetal anodes that could boost range by 40%.

Is lithium ion the future of stationary energy storage?

The second gap involved technology. "I didn't believe lithium ion was the future of stationary energy storage," Michaelson says, referring to fixed-location energy storage systems for homes, businesses, and industrial facilities—distinct from mobile applications like electric vehicles. The third gap went deeper than business fundamentals.

Are investors hoovering up renewable assets?

"Major investors like Brookfield Asset Management and CDPQ are 'hoovering up renewable assets' at attractive valuations," notes one industry analysis, suggesting long-term investors view current conditions as buying opportunities.
