

New Zealand Energy Storage Cabinet Production Project

Overview

This project is located in New Zealand, providing local clients with integrated energy storage power solutions. The system comprises 10ft 50KW-300KWh containerised energy storage units, 20ft 50KW-600KWh containerised energy storage units, and 20ft 50KW-700KWh containerised energy storage units. Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā on North Island. Paris, January 10, 2023 – Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

When will New Zealand's energy storage project come online?

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power Station as "the single largest electricity generation site in New Zealand." New Zealand welcomed its first utility-scale battery energy storage system earlier this year.

What is New Zealand's First Utility-scale battery energy storage system?

New Zealand welcomed its first utility-scale battery energy storage system earlier this year. The 35 MW/35 MWh Rotohiko battery facility commenced operation with electricity distribution company WEL Networks in April, after completing testing and commissioning.

What is the NZ battery project?

The NZ Battery Project has been exploring ways of solving the dry year problem in New Zealand without using fossil fuels and support a pathway to 100% renewable electricity generation. The dry year problem is currently managed in New Zealand by varying thermal fossil fuelled plant, burning gas, coal, and occasionally, diesel.

Will Infratec build a new energy storage system in New Zealand?

Infratec general manager Nick Bibby said that the storage system is “the first of its scale to be built in New Zealand”. As reported by Energy-Storage.news, the two companies completed their assessment of the project in late 2021, selecting a site in Huntly, a town in the Waikato District.

What will Saft's 'turnkey' storage projects do for New Zealand?

The projects will even out electricity supply from hydro, wind, and solar power, and will address electricity price volatility. Saft, whose “turnkey” containers also feature power conversion and control systems, said the contract win will be the company’s third utility-scale storage project to add flexibility to the New Zealand grid.
