

New Zealand container power generation purchase cost

Overview

Who buys electricity in New Zealand?

Lines companies are mostly owned by consumer trusts or local councils, but some are privately owned. Retail companies buy electricity from generators and on-sell that electricity to businesses and households across New Zealand. For most New Zealand electricity customers, there's a lot of retailers and brands to buy electricity from.

How does electricity supply work in New Zealand?

Supplying electricity to homes and businesses across New Zealand involves three key elements: generating electricity, transporting electricity to distribution companies, and then selling it to customers.

How does energy impact NZ ports?

context of their likely future potential and effects on NZ ports. The current annual energy consumption of New Zealand's major port companies and their core (port) operations is approximately 335 GWh per year of which 37% is electricity and 63% is fuels (primarily diesel). This is associated with emissions of approximately 62,600 tonnes CO2-e pe.

Why should New Zealand increase electricity production?

Increasing electricity production will also enable the decarbonisation of the economy – which is needed to meet New Zealand's climate goals. Despite the building of more renewable generation plants, future prices 1 for winter 2024, 2025 and 2026 remain high (see figure 1).

Does New Zealand have a wind generation stack?

This report, produced by Roaring40s Wind Power, includes an updated wind generation stack, an assessment of the potential for offshore wind in New Zealand, and the potential trend of technology costs. Wind Generation Stack Update [PDF, 4 MB].

How many wholesale companies are there in New Zealand?

There are about 80 generation companies, 62 retailers and 6 gentailers (generator-retailers) in New Zealand's wholesale market. The remaining wholesale market participants comprise distribution and network companies and traders in secondary markets, such as financial hedges.
