

Niger Emergency Energy Storage Power Supply

Overview

Does Niger need electricity?

Access to electricity remains a challenge in Niger and the country is reliant on electricity imports for a significant share of its supply. The country is an oil resource centre and it is one of the ten-largest uranium resource-holders in the world.

How is energy used in Niger?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.

Why does Niger experience power cuts?

Power cuts are unusual in Niger, which normally has regular and reliable electricity supplies. However, the country is heavily dependent on its neighbor to the south, Nigeria, as its main electricity supplier.
