

Niue s new energy storage management

Overview

The NiSERM outlines Niue's aspiration to meet 80% of its electricity needs from renewable energy sources by 2025, which would in turn reduce the country's high reliance on imported fossil fuel. This aspiration underpins Niue's contribution in this INDC, outlined in Section 6.How did New Zealand support Niue's battery energy storage system?

In addition to Australia's support, the New Zealand Government contributed \$2.5 million to relocate and restore Niue's Battery Energy Storage System (BESS). This funding has allowed the Ministry to repair the grid control system, procure necessary fuel tanks, and install cabling and connections.

What is the Niue strategic energy road map (niserm)?

In light of Niue's vulnerability on imported oil, the Niue Strategic Energy Road Map (NiSERM) 2015 – 2025 was developed, with the goal of "a sustainable energy sector for a Prosperous Niue".

Will Niue generate 80% of its electricity by December 2025?

This project aims to enable Niue to generate 80% of its electricity from renewable energy by December 2025. This afternoon marked the groundbreaking ceremony for the Niue Renewable Energy Project Phase 2. This project aims to enable Niue to generate 80% of its electricity from renewable energy by December 2025.

Is Niue dependent on imported fuel?

However Niue is 96% dependent on imported fuel for power generation and 100% dependent on imported fuel for land, sea and air transportation. Reliable, affordable, secure and sustainable energy supply is key to achieving prosperity for all Niueans.

Does Niue have a future?

Niue has the distinction of being among the world's least populated nation

states and with a future that is imperilled by the effects of climate change for which it bears absolutely no responsibility. In January 2004 the capital of Niue was destroyed by the category 5 Cyclone Heta. Niue knows the effects of severe events.

Where is Niue located?

Niue is a small Pacific Island Country (PIC) located partway between Tonga, Samoa and the Cook Islands. The island is approximately 259 km2 with an Exclusive Economic Zone (EEZ) of 300,000km2 and is reputedly one of the world's largest elevated coral atolls. The average height above sea-level is 23 metres and highest point less than 70m.
