

Nordic Communications Field 5G Base Station

Overview

Are Nordic operators celebrating 5G availability?

Analysis of Speedtest Intelligence ® data confirms that Nordic operators have much to celebrate. In Q4 2024, Nordic countries claimed three of the top five positions in Europe for 5G Availability—the percentage of users with 5G-capable devices spending most of their time connected to 5G networks.

Can a 5G NB-IoT signal be transmitted over omnispace F2 NGSO?

As part of the demonstration, a 5G NB-IoT signal was successfully transmitted over the Omnispace F2 NGSO satellite. The trial demonstrated the successful transmission and reception of data by five terminals served by the Omnispace satellite.

How have Nordic countries positioned themselves in the 5G cycle?

Nordic countries have distinguished themselves in the 5G cycle through the timely release of mid-band spectrum assets, the development of innovative government policies to enable widespread rollout beyond core urban centres and a unique appetite for network sharing.

Are satellite-based 5G NB-IoT communications viable?

This milestone proves the viability of satellite-based 5G NB-IoT communications using NGSO satellites and transparent payload architectures. As part of the demonstration, a 5G NB-IoT signal was successfully transmitted over the Omnispace F2 NGSO satellite.

Is the Nordic region a good place to invest in 5G?

Home to two of the world's largest radio vendors, Ericsson and Nokia, and characterised by markedly higher operator profitability than much of the rest of Europe, the Nordic region remains a key bright spot in Europe's struggle for competitiveness against the Middle East, North America and Asia in 5G.

How much does 5G cost in Nordic countries?

Operators in all four Nordic countries benefited from the early allocation of dedicated low-band spectrum for 5G in the 700 MHz band (first assigned in Finland in 2016 and most recently in Norway in 2019) and relatively low spectrum acquisition costs (e.g., €0.218 MHz/pop in Finland versus €0.701 MHz/pop in France).
