

Nordic Energy Storage Power Station Company

Overview

What is the largest battery energy storage project in the Nordics?

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics. The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower.

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

What is the largest energy capacity in the Nordics?

The largest by megawatt-hours energy capacity in the Nordics will be a 2-hour project in Finland that Neoen recently started building. It has a capacity of 112.9MWh, and that is also set to come online at the start of 2025.

How much storage capacity does Seb Nordic energy have?

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's Ostrobothnia region, the project is expected to be completed in 2026.

What is a new partnership between Seb Nordic energy & Ingrid capacity?

A new partnership between SEB Nordic Energy, through its portfolio company Locus Energy, and Ingrid Capacity will enable the construction of 13 new large-scale battery energy storage systems across southern Sweden, adding an additional 196 MW of flexible capacity to the national grid.
