

North American lithium energy storage power supply wholesale price

Overview

Who owns the North American Lithium Project?

The North American lithium (NAL) project is a brownfield open pit mine in the Québec province, Canada. It is owned by Sayona Québec (75%), a subsidiary of Sayona Mining, and Piedmont Lithium (25%). The North American lithium project is estimated to hold approximately 29.2 million tonnes (Mt) of ore reserves. (Credit: Ken Schwarz/Flickr).

What is the North American lithium site?

The North American Lithium site is a centerpiece of the lithium pole that Sayona Quebec wishes to develop in Abitibi-Témiscamingue. The La Corne concentrator would be used to process ore from the Authier projects in La Motte and Témiscamingue [1].

Why are lithium ion batteries difficult to source in North America?

Battery cells, especially Lithium Iron Phosphate (LFP) — the best Li-ion chemistry for safety and reliability, are difficult to source in North America due to China's decade-long head start in building out its battery manufacturing base.

Why do we need lithium-ion batteries?

Driven by the need to efficiently and effectively integrate renewable energy resources to the grid and electrify transportation, the demand for lithium-ion batteries has risen dramatically in recent years.

North American lithium energy storage power supply wholesale price

What You Need to Know about North American BESS Supply ...

As North America's battery supply chain continues to develop, EVLO is committed to further building out its robust supplier network to ensure a reliable supply of safe, reliable ...
