

# North Asia Solar Water Pump Inverter

#### **Overview**

What is a solar water pump inverter?

SI22 solar water pump inverter is cost-effective and economical, small and exquisite, palm-sized, greatly saving installation space and transportation costs. Solar pumping system converts solar energy directly into electric energy, and then drives motors to drive water pumps to pump water from deep wells, rivers, lakes and other water sources.

How does a solar pumping system work?

Solar pumping system converts solar energy directly into electric energy, and then drives motors to drive water pumps to pump water from deep wells, rivers, lakes and other water sources. The system consists of solar panels, solar pump inverter and water pump.

Are solar submersible pumps available in India?

Irrigation is a major application area for solar pumps in India. This makes India a land of huge market opportunities for solar submersible pumps. The Indian government had set ambitious targets for expanding the country's renewable energy generating capacity. In 2010, the country launched the Jawaharlal Nehru National (JNN) Solar Mission.

Which segment will dominate the solar water pump systems market?

The pump has a water lifting capacity at a direct head range of 130-160 meters that discharges water at 54 cubic meters per hour. Therefore, based on the mentioned factors above, the submersible pump type segment is expected to dominate the solar water pump systems market during the forecast period.

Can solar water pumps replace conventional water pumps?

The Asia-Pacific region dominated the global market share and emerged as one of the largest solar pump markets. With inadequate power generation

capacity and grid infrastructure for irrigation and community water supply facilities, solar water pumps have a good chance of replacing conventional pumps.

Who are the key players in solar water pump systems market?

The Solar Water Pump Systems Market is moderately fragmented. The key players in the market include Bright Solar Limited, C.R.I. Pumps Private Limited, KSB Limited, Shakti Pumps (India) Ltd, and Tata Power Company Limited. Need More Details on Market Players and Competitors?

#### **North Asia Solar Water Pump Inverter**

### <u>Solar Pump Inverters, Solar Pump Drives</u>, inverter

A high-performance 0.75kW solar water pump inverter is on sale, with an AC 2.1A output current at 3-phase 380V and a DC voltage range of (280V, 750V). The pump inverter with an output ...
