

# **North Korea Energy Storage Project Construction Plan**

## Overview

---

Does North Korea have an infrastructure plan?

Expansion In 2015, an overall governmental plan in North Korea gave priority to expanding and modernizing infrastructure in 13 open-up districts. Economic Development Association takes responsibility of that plan, which covers road construction, power security, communications security and other related issues.

Does North Korea have a power shortage?

Preface North Korea suffers from chronic energy shortages. Rolling blackouts are common, even in the nation's capital, while some of the poorest citizens receive state-provided electricity only once a year.

Does North Korea have energy security challenges?

Access to solar panels has created capacity where the state falls short, but the overall energy security challenges facing the nation are daunting. This report, "North Korea's Energy Sector," is a compilation of articles published on 38 North in 2023 that surveyed North Korea's energy production facilities and infrastructure.
