

# Norway energy storage project subsidies

#### **Overview**

Norway has begun operations on what is being hailed as the world's largest full-scale industrial carbon capture and storage (CCS) project, committing billions of dollars in subsidies to trap emissions from carbon-intensive industries such as cement. How much will Norway spend on the longship project?

While disclosing that its Longship project is nearing completion, the Norwegian government highlighted that it intends to continue its investment in the project, thus, it proposed an allocation of 2.1 billion NOK or \$197.3 million for this development in the state budget for 2025.

How much carbon dioxide will Norway Store under the sea?

It is set to store 5mn tonnes of carbon dioxide under the sea, a small fraction of the more than 2.5bn tonnes of emissions produced annually by the cement industry. "The green transition is not easy, but it is possible," said Terje Aasland, Norway's ministry of energy as he started the project.

Will Norway be able to manage CO2 in 2025?

Terje Aasland, Norway's Minister of Energy, commented: "With Longship, Europe's first full-scale value chain for CO2 management will be in operation in 2025. It is inspiring to now see the results from Norway's long-term commitment to CO2 management.

How much storage capacity will Norway have under the sea?

Norway's government on Tuesday gave the green light for the second part of the project, which will increase the storage capacity from 1.5mn tonnes under the sea to 5mn tonnes.

Will Norway develop a full-scale CCS value chain in 2025?

The project is said to reflect the Norwegian government's ambition to develop a full-scale CCS value chain in Norway, demonstrating the potential of this

decarbonization approach. Longship, with captured CO2 from Brevik and Northern Lights' transport and storage, will be operational in 2025.

How does a state guarantee work in Norway?

The sharing of risk with another professional party is a requirement, with the Norwegian state normally taking on a maximum of 50 per cent of the risk. The state guarantees will have Norway's AAA rating and will thus reduce both risk and the capital cost for the guarantee recipients.
