

Norwegian stacked energy storage battery brand

Overview

Nordic Batteries designs and manufactures high-power and high-energy battery modules, BMS and BESS products. The company bridges the gap between battery cell manufacturers and system integrators with world-leading robotic technology for automated cell stacking and battery module assembly. Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. “There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It’s the key to turning intermittent wind and solar into a stable energy source,” explains Pål Runde, Head of Battery Norway.

Why is Norway a leader in battery manufacturing?

As a pioneer in the clean energy sector, Norway has also shown strength in battery manufacturing. As the global demand for sustainable energy solutions grows, Norwegian battery manufacturers are at the forefront of this change.

Who are the top 10 battery manufacturers in Norway?

This article will introduce the top 10 battery manufacturers in Norway, such as Morrow, FREYR Battery, and TECO 2030. These companies have made significant achievements in technological innovation, sustainable production, and international cooperation, contributing not only to the Norwegian economy, but also to the global green transition.

What is battery Norway?

Battery Norway (Norwegian Battery Platform) is a national industrial collaboration platform focused on innovation and sustainable value creation opportunities, encompassing the entire battery supply chain. It will closely follow the EU’s battery strategy and act as an advisor to the authorities. Battery Norway aims to help to:

How big is Norway's battery market?

batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.
