

Pakistan Photovoltaic Module Project

Overview

Are solar modules a good investment in Pakistan?

Pakistan's customs data shows significant annual growth in the value of imported solar modules, with a sharp rise in the past two years. In April 2024, Pakistan's Federal Minister for Law and Justice Nazir Tarar proposed setting up domestic solar module manufacturing plants.

How will GCF finance distributed solar PV projects in Pakistan?

The project will provide tailored financing solutions for distributed solar PV products to help bridge the financing gap for these investments in Pakistan. A guarantee facility provided by GCF will be deployed to finance 43 MW solar PV installations for households, agribusinesses and small and medium enterprises (SMEs).

Is Pakistan experiencing a solar power boom?

Pakistan is experiencing a solar power boom. Here's what we can learn from it A prudent energy transition must take into account how to integrate renewables into the existing grid. Pakistan's unstable electricity grid has driven a boom in adoption of renewable energy, led by solar.

Will Pakistan install a desalination plant based on solar energy?

The Government of Pakistan allowed the provincial government of Sindh to conduct feasibility research. The government planned to install a desalination plant powered by solar energy. On 21 May 2022, Prime Minister Shehbaz Sharif announced the removal of 17 per cent general sales tax on solar panels.

Is solar energy a viable solution to Pakistan's energy crisis?

Solar energy in Pakistan has proven to be the most viable solution for the country's ongoing energy crisis, offering a path to sustainable economic growth, job creation, and reduced reliance on fossil fuels.
