

Phase change energy storage costs for electricity in Norway

Overview

What is a new power price in Norway?

Prime Minister Jonas Gahr Store, jointly with Energy Minister Terje Aasland, announced a landmark shift by setting a fixed power price of NOK 400/MWh (approximately EUR 34/MWh) for households.

How much electricity does Norway use in 2023?

e in 2030, 2% in 2040 and 6% in 2050. Even for Norway, with one of the world's most renewable energy-based power systems, the ongoing transition will further increase the share f electricity in final energy demand. In 2023, electricity represented 44% (424 PJ of the country's final energy use. In 2.

How much electricity does Norway produce in 2021?

In 2021, Norway had an electricity production of 157 TWh, of which 91% was from hydropower, 8% from onshore wind, and <1% from thermal sources (NVE, 2021b). This shows that the Norwegian generation mix is already dominated by renewable energy. In normal weather years, Norway exports around 19 TWh of electricity to neighbouring countries.

Will fossil fuel costs affect electricity prices in Norway in 2040?

Electricity prices remain strongly affected by fossil fuel costs to 2040. The 2040 power price in Norway is modelled to be 39 ± 4 €/MWh. Market value of Norwegian hydropower is 34% higher than the average power price. Seasonal patterns for solar PV give <3% probability of revenues higher than the LCOE.

How do carbon prices affect electricity prices in Norway?

Increased carbon prices cause an increase in the cost of importing electricity, as well as increased export of flexible Norwegian hydropower. This increases the value of transmission lines, but it also increases the Norwegian power prices. 3.2.4.

What is the price effect of increasing hydropower capacity in Norway?

Generation capacity The price effect of increasing the installed capacity in Norway is between $-0.03 \in MWh$ and $-0.69 \in MWh$ per GW of additional capacity, depending on the technology. The highest price sensitivity is observed for increased capacity of highly flexible hydropower plants.
