

Photovoltaic panel size in Mozambique

Overview

Does Mozambique need solar energy?

In the rapidly evolving world of renewable energy, Mozambique has emerged as a significant player, especially in the solar energy sector. With its abundant sunshine and increasing focus on sustainable development, the demand for solar energy systems in Mozambique has seen a considerable rise.

Why is Mozambique a good place to invest in solar energy?

Firstly, Mozambique has a high solar irradiation level, making it an ideal location for harnessing solar energy. This abundant solar resource presents a sustainable and cost-effective solution for addressing the country's energy needs.

Who built Mozambique's first large-scale solar power plant?

Capital and expertise from Scatec Solar, KLP and Norfund enabled the construction of Mozambique's first large-scale solar power plant. Central Solar de Mocuba (CESOM) provides over 79 GWh of electricity annually, which is equivalent to the electricity consumption of more than 170,000 households in Mozambique.

How will Mozambique's power plant's strategic location affect the grid?

The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid. It is estimated that the power plant's connection to the EDM grid will result in a seven percent improvement in the network default level.

Where is Mozambique's power plant located?

The plant was built in the Zambezia Province in north-central Mozambique. Mozambique is one of the poorest countries in the world and access to electricity is extremely limited. In rural areas only 6 percent of the population has an electricity supply. National demand for electricity is growing

significantly due to industrial and commercial growth.

Why did EDM join central solar de Mocuba?

It was also a unique opportunity for EDM to gain technical, commercial and practical experience in utility-scale solar solutions. Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year.

Photovoltaic panel size in Mozambique

Mozambique Installed Solar Energy Capacity

Mozambique's solar energy sector is making commendable progress, with increasing capacity and numerous projects underway. The installed solar energy capacity, currently about 55 MW, ...
