

Photovoltaic power station power generation cost in Malaysia

Overview

The report finds solar generation in Peninsular Malaysia was 53% cheaper than fossil fuels in 2023. Source: Single Buyer, Energy Commission, Ember's analysis Note: Solar generation costs are based on the lowest auction rates of LSS 1-4 with 30-50 MW size range to be commissioned by 2018 to 2023. Is utility-scale solar outperforming new coal and gas plants in Malaysia?

Utility-scale solar already outcompetes new coal and gas plants in Malaysia in terms of economics. The LCOE for solar in the country has been declining sharply since 2019, thanks to the technology's increased deployment in Malaysia and falling solar equipment prices globally.

Does Scatec Solar have a solar plant in Malaysia?

"We are pleased to have reached commercial operation for the Jasin solar plant, doubling our assets in operation to 130 MW in Malaysia," said Scatec Solar CEO Raymond Carlsen. Jasin is the second of three utility-scale solar power projects Scatec has been developing in Malaysia.

Where are Malaysia's photovoltaic installations coming from?

Malaysian Photovoltaic Industry Association (MPIA) president Davis Chong observed a significant uptick in installations, with major urban centres like the Klang Valley, Johor and Penang leading the charge, with growing interest in states such as Kedah, Melaka, Perak and Negeri Sembilan.

How much would a 1GW coal power plant cost in Malaysia?

On the other hand, burning only coal at a 1GW coal power plant in Malaysia would annually cost \$0.18 billion in 2030, \$0.17 billion in 2040, and \$0.15 billion in 2050 for coal procurement. Ammonia procurement from the cheapest source each year would be eight times more expensive than coal procurement in 2030 and about nine times costlier by 2050.
