

# Photovoltaic solar panels in rural areas of Qatar

### **Overview**

Is Qatar a good country for solar power?

With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country. Qatar's global horizontal irradiance is 2,140 kWh per m 2 per year which makes it well-suited for solar photovoltaic (PV) systems.

How many megawatts does Qatar's new solar plant produce?

The addition of 875 megawatts from these two new solar plants, along with the 800 megawatts produced by the Al Kharsaah plant that came into service in 2022, will bring Qatar's total solar energy production capacity to nearly 1,700 megawatts.

What is Qatar's first large-scale solar project?

Al Kharsaah, Qatar's 1st large-scale solar project, will start providing sustainable, economical, and clean energy to enterprises, organizations, and citizens via the Qatari grid in 2021, with a 350 MWp capacity initially, before attaining maximum capacity in 2022.

Will Qatar install solar panels on a redundant roof?

To make up for Qatar's space constraints, the company plans to install solar panels on redundant surfaces such as roofs of power stations and water reservoirs, thereby utilizing existing power transmission lines which will substantially reduced construction costs.

Can energy system modelling be used to study infrastructure in Qatar?

While other researchers have used the tools of energy system modelling to study the infrastructure of other Gulf states , , , our model is the first to look at the overall energy system in Qatar.

How much power does a solar power plant provide?

With a production capacity of 800 megawatts across 10sq km and equipped with more than 1.8mn solar panels, the plant supplies electricity to roughly 60,000 homes. It literally covers up to 10% of the nation's electricity needs at peak times and delivers power at a highly competitive rate.

### Photovoltaic solar panels in rural areas of Qatar

# Challenges Facing Solar Panel Energy Deployment within ...

MW of power in the fourth quarter of 2021, is one of Qatar's major solar projects. According to Qatar's energy minister, in January 2020, the government inked a deal with Total, a French ...
