

Power generation efficiency of photovoltaic panels from major manufacturers

Overview

Are solar panels efficient?

Most solar panels are at least 20% efficient, but the best ones are over 22% efficient. We reviewed the efficiency ratings of hundreds of home solar panel models and found that five brands stood out: Maxeon, Qcells, Canadian Solar, REC, and Panasonic.

How efficient are solar panels in 2025?

Basically, the more efficient solar panels are, the more power they can generate. In 2025, its standard for residential solar panels to be between 21% and 22% efficient – but many brands are reaching ratings in the 23% range. Here are the most efficient solar panels that are currently available in 2025: Is solar panel efficiency important?

.

Which residential solar panels have the highest efficiency ratings?

Our CNET experts have found the market's top performers with the highest efficiency ratings. The most efficient residential solar panel right now is the Maxeon 7, which dethroned the older Maxeon and Canadian Solar panels when it launched in February 2024.

Who makes high-efficiency solar panels?

Other high-efficiency solar panels on the market come from JA Solar, REC Group, VSUN, and Canadian Solar. The efficiency of solar panels is impacted by the type of solar cells used, the direction and angle that the panels are installed, and local climate and weather conditions.

Will residential solar panels reach 50% efficiency?

The likelihood is that residential solar panels will eventually reach 50% efficiency as solar cell efficiency continues to rise. Solar modules in lab

settings have hit close to this number, around 47%.

Which solar panels are the most efficient?

Trina Solar, a Chinese company that makes this kind of panel, set a world record in June 2025 by creating a 30.6% efficient model. With a 360W power rating across a 1.185m² panel, this product would easily top our list – except it hasn't been released to the public yet, and likely won't be for years.
