

Price of ground-mounted photovoltaic panels in Burundi

Overview

How much does a ground-mounted solar system cost?

The average homeowner can expect to pay between \$27,000 and \$60,000+ for a ground-mounted solar system. Businesses can expect to pay \$150,000 to \$500,000+ for a ground-mounted solar system. Note: Depreciation savings are based on a 24% federal tax rate and do not include any depreciation on state taxes.

What is a ground-mounted solar system?

Ground-mounted solar systems are free-standing structures that support solar panels. Because they can be installed wherever conditions are best for solar power production, they're a great alternative to the traditional roof-mount solar system.

How do I determine the cost of my ground-mount solar system?

The best way to determine the cost of your ground-mount solar system is to request a free custom quote. With a custom quote, you'll see the complete installation cost, all available incentives, and the payback and ROI. Not ready for a quote?

.

How do ground-mounted solar panels work?

Added Technology - Ground-mounted solar systems can be installed as a static structure or as a tracking system. Tracking systems, or pole-mounted systems, utilize added technology to orient the solar panel to face the sun. They'll change their direction as the sun moves across the sky during the day.
