

Price of photovoltaic panels for the whole house

Overview

It costs around \$30,000 to install solar panels. That's a big number, but incentives usually lower it significantly. The average U.S. solar shopper needs about 11 kilowatts (kW) of home solar to cover their electricity usage. How much do solar panels cost if I do a DIY installation?

A DIY solar installation will cost somewhere between \$9,000 and \$15,000, depending on the system size and equipment used. When you install solar yourself, you don't have to pay labor costs, customer acquisition costs, or installer profit margins.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

Which solar panels are best for your home?

They offer the highest efficiency rates, around 15%-22%, and the longest lifespan. Their higher cost reflects their superior performance and smaller footprint needed to generate the same amount of power. They're great for homes with limited roof space. Polycrystalline: Polycrystalline solar panels are made from multiple silicon crystals.
