If your needs are simple, you can pick up a good portable power station for around \$150-200. What is the difference between a portable power station and a generator?

.

How long does a portable power station last?

It depends on how often you use your power station and the type of battery inside. Like any battery, for example one in a phone or laptop, this will wear down over time until the power station no longer holds charge. General estimates put the lifespan of a portable power station at around ten years.

Should you buy a budget portable power station?

The trade-off for getting a budget portable power station comes from the lower battery capacity, which sits at just 256Wh. So, you won't be able to power most household appliances or anything like that, but it's more than enough to keep smaller devices like your phone and laptop on charge.

What is a portable power station?

A truly portable power station will be light and small, but it won't be able to do as much as the huge ones. It all depends on what you need. The smaller power stations are usually great at charging phones, tablets, powering small appliances, etc.
