

# **Purchase photovoltaic power station power generation**

## Overview

---

How many solar photovoltaic plants are there?

There are currently over 10,000 solar photovoltaic (PV) plants that meet this definition. Falling costs and increased demand for renewable energy mean that the utility-scale solar sector has boomed in recent years.

What is a portfolio Power Purchase Agreement (PPA)?

Portfolio Power Purchase Agreement: A portfolio PPA aggregates multiple renewable energy projects to fulfill the buyer's energy requirements. This approach offers diversification by spreading the buyer's energy sourcing across various projects, reducing exposure to risks associated with individual projects.

What is a physical delivery Power Purchase Agreement (PPA)?

Physical Delivery Power Purchase Agreement: In a physical delivery PPA, the buyer directly receives the electricity produced by a renewable energy project. This arrangement entails straightforward ownership of the power and its associated attributes by the buyer.

## Purchase photovoltaic power station power generation
