

Qatar photovoltaic combiner box manufacturer

Overview

What is a PV combiner box?

A PV combiner box combines multiple strings of solar panels into one main output circuit. It's essential for any solar installation with multiple strings as it provides overcurrent protection, surge protection, and circuit isolation, ensuring the safety and efficiency of your solar system.

Who is letop solar combiner box manufacturer?

We are LETOP, a professional Solar Combiner Box manufacturer. We have been deeply involved in the industry for 15+ years. With excellent R&D strength and advanced production technology, we provide high-quality and high-performance photovoltaic combiner box & related components to global customers.

What is a 600v DC combiner box?

600V DC combiner box is LETOP's economical solution designed for small PV systems. It offers 1-6 string inputs and 1-2 string outputs. Supports 600V DC system voltage. It also uses high-quality components to ensure overcurrent and overvoltage protection. Suitable for 5kW-10kW small residential rooftop or small commercial PV systems.

How many string configurations can a combiner box support?

The combiner box supports a maximum of 24 string configurations, it is suitable for 1500V DC system voltages. It features industrial-level protection design, including string monitoring, RS485 bus/standard MODBUS-RTU protocol, arc fault detection, and fast shutdown/fireman switch functions.

What is an AFCI combiner box?

AFCI (Arc Fault Circuit Interrupter) combiner boxes include special technology that detects dangerous electric arcs and automatically shuts down the affected circuit. This provides an additional layer of fire protection beyond

what standard combiner boxes offer.
