

# **Romania small photovoltaic panel BESS price**

## Overview

---

How much is a solar project in Romania?

(EUR 1.0 = USD 1.089) The Romanian Energy Ministry has signed contracts to distribute close to EUR 70 million (USD 76.3m) in grant funding that will support the construction of a 1.5-GW solar panel manufacturing plant and five large-scale battery storage system (BESS) projects.

Can a battery be used in a PV system in Romania?

As the price for every kWh injected into the network and battery energy storage system (BESS) costs are dynamic, the household and industrial consumers who want to integrate a battery in their PV system may have difficulties choosing between the commercially batteries available on the Romanian market.

Where will a solar panel factory be built in Romania?

The company will receive a grant of EUR 32.9 million for its plan to build a solar panel factory in Barlad, in Vaslui County in eastern Romania close to the border with Moldova. The remaining funding will be distributed among five projects that will collectively add almost 800 MWh of battery energy storage capacity in the Balkan country.

Which Romanian companies are adding Bess to their renewable assets?

Other Romania-based companies, such as Parapet and Waldevar Energy, have told pv magazine that adding BESS to their renewable assets is a top priority. The May edition of pv magazine features an in-depth look at Romania's solar and energy storage markets.

Where can I buy a Bess battery in Romania?

If the BESS may be purchased directly from the manufacturer in some countries, most manufacturers do not have retail stores in Romania. The battery is purchased from either the distributor, who can offer free shipping,

or from the manufacturer with stores in other countries and adds the costs for shipping.

How much solar energy is possible in Romania?

Romania is located in an area with a solar potential of 210 sunny days per year and with an annual solar energy flux between 1,000 kWh/m<sup>2</sup>/year and 1,300 kWh/m<sup>2</sup>/year. From this total amount, around 600 to 800 kWh/m<sup>2</sup>/year is technically feasible. Chart 1: Solar Resource Map of Romania; Sources: World Bank Group, ESMAP, SolarGis
