

Russian energy storage cabinet battery production

Overview

Will Russian energy storage firm Renera invest in EV batteries?

June 23, 2023: Russian energy storage firm Renera says a special investment contract providing incentives and financial backing for domestic production of batteries for EVs and stationary storage systems was signed at the St Petersburg International Economic Forum on June 16.

Will Russia produce a prototype battery by the middle of the year?

The move follows Russia's claim last month that it will have produced prototype batteries by the middle of the year.

Should Russia create an infrastructure for EV charging stations?

Russia must also "create an infrastructure for charging stations" for EVs, he said. Rosatom announced on November 23 that it had established a new subsidiary — Renera — dedicated to the manufacture of energy storage systems.

Will Renera produce energy storage systems and lithium-ion cells?

The facility will produce energy storage systems and lithium-ion cells. Credit: TVEL Fuel Company. Russian energy storage company Renera has signed an agreement with the Kaliningrad regional government to build a manufacturing facility in Russia's Western exclave region to produce energy storage systems and lithium-ion cells.

What will Russia's new lithium-ion plant do?

The plant will focus on the production of lithium-ion cells and energy storage systems and will have a total annual battery manufacturing capacity of at least 3 GWh. "The signals we receive from the Russian market indicate that the production volumes we planned a year ago may be insufficient.
